

Certificate of ADCF Status

Protein ID:	Qk039
Protein Name:	Recombinant human FGF-9
Lot Number:	104295
Animal-Derived Component Free:	Yes
Animal Origin Free Manufacturing Process:	No
Country of Manufacture	UK

All raw materials used in the manufacture of human FGF-9 are animal-derived component free to the tertiary level of manufacturing, as certified by supplier-provided documentation.

All components of our manufacturing processes are AOF (animal-origin free) to the secondary level, with the exception of a derivatized chromatography matrix used in the purification of the FGF family of growth factors.

Following review of the regulatory support file for this matrix, we have concluded that it is appropriate for use in our ADCF laboratory and that cytokines produced using this matrix can be considered ADCF but not AOF.

Further information regarding our animal-derived component free policy is online at: <https://qkine.com/animal-free-manufacture/>

Approved by: JJ (Scientific Operations Manager)

The above information is correct to the best of our knowledge based on the information we have been given and the information available to us at the time this document was issued.
