Setting the standard in bioactive protein manufacturing

Qkine manufactures high purity, animal-free growth factors, cytokines, and other complex bioactive proteins. Made with exceptional lot-to-lot consistency for scientists who need reproducibility in their stem cell culture. **Bioactivity Guaranteed.**

All our recombinant proteins are certified animal-free, so you can be reassured that there is no contamination with endogenous growth factors and they are suitable for chemically defined media. Qkine proteins are manufactured in our ISO9001: 2015 facility in Cambridge, UK, with comprehensive CoO, CoA, sterility data, and animal-free (AOF) documentation. Extensive biochemical and bioactivity data is provided for every lot.
